

Lifting Manikin

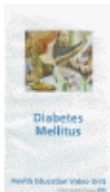

12.07.001

A unique model which graphically illustrates the effect on the spine of a bad lifting posture. The figure will raise a weight from either of two clearly marked positions. If the correct posture is used the spine is not distorted. The incorrect posture causes obvious distortion to the spine.

Asthma
12.11.002

The number of new cases of asthma in the United Kingdom has risen dramatically since the 1950s. The proportion of the population who wheeze has increased significantly and during the 1980s there was a marked rise in the number of children admitted to hospital with acute episodes of wheezing. This video uses a blend of live images and sophisticated 3D computer graphics to explore the reasons behind these increases and examines those factors involved in the development of asthma, such as smoking, air pollution and diet. Asthma also details the clinical features of the condition, and describes available treatments and possible future developments.

Diabetes Mellitus
12.11.006

Diabetes is a major health problem which affects many lives. Most people know someone with diabetes but very few have a full understanding of the condition. Diabetes mellitus studies both insulin and non-insulin dependent diabetes and the many complications they can produce. It examines the various treatments and discusses research initiatives currently underway. Detailed medical facts are presented very simply using an award-winning mixture of live imagery and sophisticated computer graphics with a narration that is clear and easy to understand.

Every Little Breath
12.11.001

In this video Michael Aspel and Dr David Heaf, Senior Lecturer in child Health (Respiratory Medicine), Alder Hey Children's Hospital, Liverpool, explain the signs and symptoms of asthma, its causes and treatment. By understanding more about asthma, teachers and school nurses can feel more confident in helping the children with asthma in their schools.

Fighting Asthma Together: A Guide For Schools
12.11.005

This video takes a positive look at asthma. It will help you to understand the condition better, learn what to do in an asthma attack or emergency situation and help you feel more confident in helping children with asthma in your school.

Holly's Story
12.11.003

Norman Pace & Dr Hilary Jones

This video is about a baby who contracted meningitis when she was just 4½ weeks old. Meningitis Research Foundation patron Norman Pace, of the comedy duo Hale and Pace, tells Holly's story which is interspersed with symptoms and vaccine information given by Dr Hilary Jones, also a patron of the charity. The video is suitable for Health Educators, student nurses and parents and other carers of babies and young children.

Visions
12.11.007

This video examines six common eye conditions - glaucoma, diabetic retinopathy, cataracts, macular degeneration, retinal detachment and amblyopia - which, if left undiagnosed and untreated, can lead to permanent loss of sight. The video explains the biology of each condition along with diagnostic techniques and treatments.

**What You Really Need To Know
About.....hepatitis**
12.11.009

If you're suffering from hepatitis - or if someone you're close to is - then this video will help you understand what the condition is all about, how treatment can help and other important practical points. Introduced by John Cleese and presented by Dr Robert Buckman.

Asperger's Syndrome In Young Children

12.13.012

Laurie Leventhal-Belfer and Cassandra Coe

This book focuses on how Asperger's Syndrome (AS) presents in young children. An essential guide for parents coming to terms with their child's AS diagnosis and for the professionals who work with this group, it is unique in answering pressing questions specific to younger children. How can parents help their child with AS to develop speech and language? What help is available at school and home? When, if at all, should a child be informed about AS? Including a useful summary of early childhood development stages, Leventhal-Belfer and Coe provide a diagnostic model based on assessment of the child in contrast to "neurotypical" children, considering relationships at home, in school or in care. Their book shows how to develop tailored early intervention strategies and to assist parents, teachers and mental health professionals in making informed decisions to nurture and development of children with AS.

Asthma At Work

12.13.004

Rory O'Neill

This book is published alongside a joint campaign between the TUC, local safety campaigners and the National Asthma Campaign. Explains about the causes, effects and what to do about occupational asthma.

Asthma At Your Fingertips

12.13.008

Dr Mark Levy, Prof Sean Hilton & Greta Barnes MBE

This practical handbook answers 263 real questions asked by people with asthma and their families. The authors' expert answers give you the knowledge to help you lead a happy, healthy and normal life.

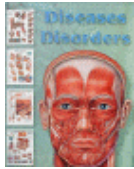

Conquering Asthma

12.13.001

Peter J Barnes & Michael T Newhouse

This book will help asthmatics to participate actively with their doctor in monitoring and undertaking self care of their condition. It will show most asthmatics - adults and children how to lead full and active lives at home, at work and in their recreation.

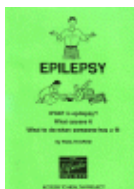

Diseases & Disorders

12.13.013

Philip Harris

This book features 35 anatomical charts. Each chart is clearly labelled and features annotations where appropriate. Illustrations included depict; Dangers of Alcohol; Understanding Allergies; Understanding Alzheimer's; Arthritis - Joint Inflammation; Understanding Breast Disease; Understanding Cancer; Cardiovascular Disease; Understanding Carpal Tunnel Syndrome; Conditions for Caesarean Section; Understanding Cholesterol; Understanding the Common Cold; Understanding Diabetes; Diseases of the digestive system; Understanding Epilepsy; Disorders of the Eye; Gastroesophageal Disorders & Digestive Anatomy; Heart Disease; Hip & Knee Inflammations; Understanding HIV & AIDS; The Human Spine Disorders; Hypertension; Knee Injuries; Understanding Menopause; Middle Ear Conditions; Understanding Osteoporosis; Understanding Parkinson's Disease; The Respiratory System & Asthma; Understanding Skin Cancer; Dangers of Smoking; Understanding Stroke; Disorders of the Urinary Tract; Whiplash Injuries

Epilepsy

12.13.011

The Elfrida Society

This booklet has been designed for people with learning difficulties. Aims to explain the following:~ WHAT is epilepsy?~ What causes it~ What to do when someone has a fit.

Food Allergy

12.13.003

This book has been written to introduce health professionals to the fact which are known about food allergies. It is hoped that it will also stimulate them to question whether patients with unrecognised food allergies are present their practices and assist them in the management of these patients.

National Service Framework For Diabetes: Delivery Strategy

12.13.010

The National Service Framework for Diabetes sets out a ten-year programme of change to deliver a world class care and support for people with diabetes. The only way this better care and support can be delivered is through the development of the clinical practice of staff throughout the country. This Delivery Strategy suggests how this can be achieved. Explains about the key elements proposed in implementing the Delivery Strategy.

**National Service Framework For
Diabetes: Standards**

12.13.009

This document, the first part of the National Service Framework for Diabetes, sets out twelve new standards and the key interventions necessary to raise the standards of diabetes care. The NSF aims to make best practice the norm: better support for people so they can more effectively adjust their insulin use in their lifestyle; dedicated nurses on hospital wards to reduce the length of stay in hospital and cut the number of complications; and community based diabetes clinics to bring together at one location and at one time specialist expertise and services, including foot care and eye screening. The NSF:Standards includes standards, rationales, key interventions and an analysis of the implications for planning services. It exemplifies the approach to patient focused services set out in The NHS Plan and The Expert Patient.

**Surveillance Of Healthcare Associated
Infections Report 2007**

12.13.015

This is the second report on HCAI, which focuses on those infections subject to mandatory surveillance. It places them in the context of broader surveillance, not currently mandatory, of bloodstream infections and surgical site infection. This gives a broader perspective and sometimes additional information which then inform the findings from the mandatory surveillance.

**The Which? Guide To Managing
Asthma**

12.13.007

Mark Greener

Written by a medical journalist who is himself an asthma sufferer, this book explains the latest treatments so that sufferers and their families can regain control of their lives, includes; What happens to the body during an asthma attack; the different types of asthma, including the various ways that it affects young people, adults and the elderly; the different treatments available, including complementary therapies; advice on diet, exercise and avoiding pollution.

**Your Local Care: Diabetes Services In
England**

12.13.014

Research by Dr Foster and Diabetes UK

This report examines the structures and facilities currently in place to meet the standards set by the National Service Framework (NSF) for Diabetes Standards and Delivery Strategy for England. The report also aims to examine any self-reported progress that has been made towards achieving these standards since the 2003 and 2004 Dr Foster/Diabetes UK Surveys, and where like-for-like data exists among the years, this information is presented.

Asthma Module

12.15.002

This module addresses the issues of Asthma in a way that relieves the anxieties of the child, his/her parents, and those responsible for the child in a variety of settings. The module contains a video, a series of acetates, trainer's script, resourcematerials, references and is designed to be used as a teaching aid by health & child care professionals.

Diabetes And Weight Management

12.15.007

This Diabetes UK's weight management information pack is aimed at practice nurses and GP's, and seeks to provide the tools to help tackle the major problem of weight management for people with diabetes. The pack comprises:~ Weight Management - Managing diabetes in primary care: This booklet is aimed at healthcare professionals working in primary care.~ Weight creeping up on you? Diabetes and Weight Management: This leaflet explains the link between diabetes and being overweight and gives practical advice on getting started for those who want to manage their weight effectively. It is aimed at people who have Type 2 or Type 1 diabetes.~ Is you weight creeping up on you?: A4 Poster.~ Diabetes care today: A guide for managers and staff in residential and nursing homes.~ Diet and diabetes presentation: A PowerPoint presentation on the dietary requirements for diabetes, which dieticians can use with people with diabetes.

Diabetes Awareness Toolkit

12.15.009

Some people from the black and minority ethnic communities are up to six times more likely to develop Type 2 diabetes than the white population. To meet the needs of people from diverse communities, Diabetes UK has developed a toolkit aimed at healthcare professionals and community leaders. The toolkit, which includes speaker's notes and slides, is designed to assist key workers in holding diabetes awareness days and helping people to understand diabetes and complications involved. There are four sections to the toolkit.

Diabetes Module

12.15.003

Mid-Downs Health Authority

This module examines the medical aspects of Diabetes and the emotional and social impact on the child and his/her family. It aims to help those responsible for children with diabetes to understand the condition. The module includes a tailor made video and is designed to be used as a teaching aid by health and child care professionals.

Diabetes: A Simple Guide

12.15.008

North West Surrey Health Promotion

This pack has been produced to help people with a learning disability and their carers to understand about Diabetes. It helps to explain what diabetes is and how it can be treated. This pack is aimed to complement guidance from your GP. Intended to give a simple guide to how you can manage your Diabetes and the tests that your GP may undertake to see if your Diabetes is under control. Dived into sections looking at different investigations. These sections can be used

as a stand alone teaching aid or as part of a continuing session.

Epilepsy Module

12.15.001

Mid-Downs Health Authority

This module covers the biology of Epilepsy, what can trigger an attack, first aid and social management of the condition. The module is supported by a video, acetates, handouts and is designed to be used as a teaching aid by health and child care professionals.

Infection Control Module

12.15.004

Mid-Downs Health Authority

A comprehensive training pack for use with adults who work with children, aims to raise awareness around the issues to do with the transmission of infections and to promote understanding of the concept of standard hygiene precautions.

The Human Spine: Disorders

12.16.004

This laminated poster shows various spine disorders associated with the back. Suitable for use as a teaching aid and/or a source of reference. Approximately 50 x 67cm.

Understanding Diabetes

12.16.003

Anatomical Chart Company

This laminated poster explains about diabetes and its effects, can be used as a teaching aid and/or a source of reference. Measures 20" x 26".

Understanding Alzheimer's

12.16.007

Anatomical Chart Co

Discusses the aging brain and dementia, providing an overview of Alzheimer's Disease (AD). Illustrates affected areas of the brain and the abnormal cellular structures involved with AD: granulovacuolar degeneration, neurofibrillary tangles and amyloid plaques. Discusses the stages of Alzheimer's Disease and shows the physical changes in the brain cortex caused by AD. Illustrates and defines the role of neurotransmitters as messengers. Size: 20" wide by 26" high

Understanding Type 1 Diabetes

12.16.005

This chart defines Type 1 diabetes. It illustrates the digestive system, provides a cellular view of the pancreas, compares normal cells versus diabetic cells, and shows glucose build up. The chart lists complications with Type 1 diabetes and describes hypoglycemia and hyperglycemia, including symptoms and treatments. Detailed management techniques for maintaining control of Type 1 diabetes are also included. Size is Width 20" x Height 26".

Understanding Asthma

12.16.002

Anatomical Chart Co.,

This laminated poster explains about many different aspects of asthma and can be used as a teaching aid and/or a source of reference. Measures 20"x 26".

Understanding Type 2 Diabetes

12.16.006

This chart defines Type 2 diabetes along with causes, symptoms, complications, risk factors and management techniques. Illustrations show a cellular view of the pancreas and comparison of a normal cell versus a diabetic cell. Size is Width 20" x Height 26".

What Is Asthma?

12.16.001

This laminated poster aims to answer many questions about asthma can be used as a teaching aid and/or a source of reference. Approximate size 83 x 60cm.
