

Immunisation

21.10.001

NHS Immunisation

This DVD highlights the importance of immunisation in protecting children from serious diseases. The film was directed and produced by Barraclough Productions, and uses an extract from 'Naomi's story – a report from Dublin' taken from their 'Fragile Lives' documentary. The film reminds us that measles is a very serious disease, and the importance of protecting children by ensuring they receive the correct immunisations, at the correct time. Produced in the following versions: English; English Sub-titles; British Sign Language; Bengali; Chinese (Cantonese); Gujarati; Polish; Punjabi; Somali; Urdu.

Mmr: The Big Questions

21.11.008

The MMR vaccine is necessary and important for preventing the re-appearance of Measles, Mumps and Rubella. Following bad publicity surrounding the use of the vaccine, the levels of immunisation dropped. Although this drop has now levelled out, MMR has an image problem. In this programme the big questions surrounding MMR are discussed by: ~ Dr David Elliman, Consultant Paediatrician, St Georges Hospital. ~ Dr Elizabeth Miller, Head of Immunisation, Public Health Laboratory Service. ~ Judith Moreton, Immunisation Co-ordinator, Oxfordshire. ~ Joanne Yarwood, Immunisation Manager, Health Promotion England. The session is hosted by television journalist Sankha Guha.

Mmr: What Parents Want To Know

21.11.002

Few of us would question the benefits of immunisation. Vaccines have reduced the incidence of serious and life-threatening diseases and in some cases eradicated them. So what are parents to make of the controversy surround the MMR vaccine? This video has been produced with parents to try and find a way through the mass of apparently conflicting stores about MMR. A group of parents as they put their concerns and question directly to the Government's Principal Medical Officer for childhood immunisations, the head of the immunisation division of the Public Medical Officer for childhood immunisation, the head of immunisation division at the Public Health Laboratory Service, a consultant paediatrician and a health visitor. This video has been made for parents with parents. It deals with MMR thoughtfully and honestly, and makes a positive contribution to the debate on MMR.

Safeguarding Their Future

21.11.006

This video contains information on Diphtheria, Tetanus, Pertussis, Polio and Hib immunisations. Emphasis on safety of vaccination. **DUE TO RECENT IN THE IMMUNISATION PROGRAMME, IT IS IMPORTANT THAT YOU REFER TO THE LEAFLET "A NEW GUIDE TO CHILDHOOD IMMUNISATIONS".**
