Safe Sex Training Resources: Sti's Flash Cards

27.07.002

One of the classic training tools! These flash cards cover 10 STI's with explicit medical content. A duplicate set of STI flash cards are also included with the explicit images omitted for use with young people or the very squeemish! They are freshly designed to be clearly visible from a distance, or passed out amongst a group. Each card is laminated in thick plastic for durability and sets are contained within a strong moulded case. With one side bearing the subject introduction and the other the detailed subject information, they are ideal for classroom or lecture situations. Ideal for testing the subject's knowledge against the information on the rear of the card.

Virtual Gum

27.09.001

The main target group for this CD Rom is young people who are or are about to become sexually active and its intended use is as part of a planned programme of sexual health and relationships education in schools. However, Virtual GUM may also be of interest to other professionals who work with groups or individuals. Virtual GUM is intended to inform raise awareness amongst people who are or are considering becoming sexually active; it allows them to explore the clinic as either a male or a female. They can choose from a variety of topics such as:~ How do you use a male condom?~ How do you use a female condo?~ Can I have a test for HIV?~ Can I have a test for Hepatitis C?They can ask for an appointment, be seen by the nurse and tell her what the problem is by making a selection from the most common sexual infections then, if necessary, be examined by the doctor.

Indications Of Public Health In The English Regions - 6: Sexual Health
27.13.005

As part of a series 'Indications of Public Health in the English Regions' commissioned by the Chief Medical Officer, a report on Sexual Health has been produced jointly by the Association of Public Health Observatories (APHO) and the Health Protection Agency (HPA). The report provides the first comprehensive regional comparison of sexual health in England. Over 70 indicators are included on a wide range of topics from abortions, conceptions and births, to HIV and other sexually transmitted infections, access to family planning clinics, and information about lifestyles and attitudes.

National Chlamydia Screening Programme
27.13.007

This document has been prepared to provide guidance for participation in the implementation of the National Chlamydia Screening Programme for England. It details the vision, rationale and recommendations for developing an evidenced based and cost-effective national screening programme for genital chlamydial infection in England.

New Frontiers
27.13.006

National Chlamydia Screening Programme Steering Group

The report's title, New Frontiers, reflects the movement of the NCSP this year into a new scale of operation within a new NHS environment and the new opportunities for community-based collaborative development across the health economy of England. In this third year of implementation, the Programme has confirmed that screening for Chlamydia can be delivered safely and effectively in a wide variety of medical and non-medical settings and via both statutory and voluntary providers. Sexually Transmitted Diseases

27.13.003

Editor: Craig Donnellan

The rising trend in STD's continues unabated. New figures suggest that nearly one in ten young women in the UK has a sexual infection; and in young men the number of cases of gonorrhoea rose by 29% between 1999 and 2000. Meanwhile, the number of cases of HIV and AIDS is expected to rise by 40% over the next three years. This book examines the latest trends, the methods of prevention and search for cures. The information comes from a wide variety of sources and includes government reports and statistics, newspaper reports, features, magazine articles and surveys, literature from lobby groups and charitable organisations. Includes a four-page study guide which contains a variety of discussion points and other activities to suit a wide range of ability levels and interests.

The Handbook Of Sexual Health In Primary Care

27.13.004

T Belfield, Y Carter, P Mathews, C Moss & A Weyman

Sexual health is an increasingly important issue for the NHS, and general practice is playing an ever greater role in delivering services to patients.
